

Listening to Our Neighbors

**2026 Wynnewood North
Conservation District Survey
Results**

August 2026

Listening to Our Neighbors

Purpose

- The Conservation District Committee sought neighborhood input regarding proposed standards that may help preserve the unique character of Wynnewood North.
- Survey results were evaluated using a consistent and transparent methodology to assist the Committee in determining which proposed standards should be **carried forward** into its draft proposal.

Neighborhood Participation

<u>Measurement</u>	<u>Result</u>
Homes in Wynnewood North (<i>approx.</i>)	280
Survey Responses	110
Unique Households	105
Household Participation	37.5%

Key Observation

More than one-third of all households participated in this voluntary survey, providing meaningful community input for the Committee's consideration.

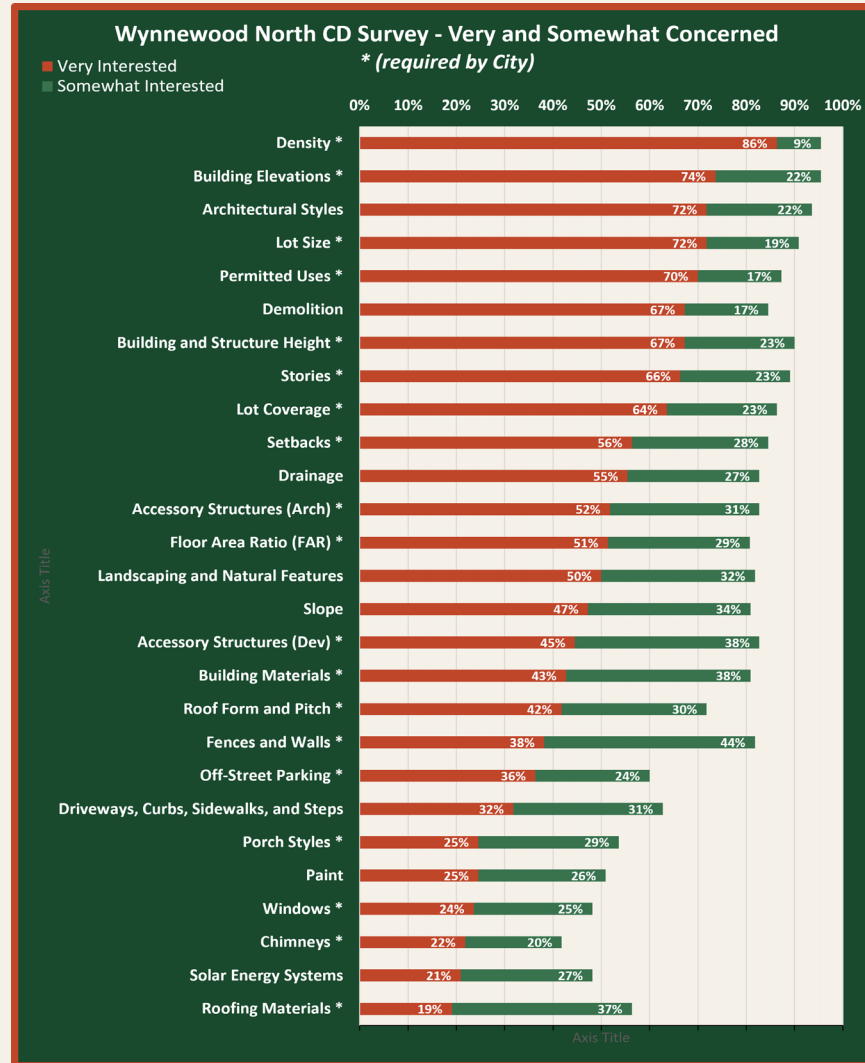

Committee Evaluation Methodology

Each proposed standard was evaluated using one consistent process.

- "Very Interested" and "Somewhat Interested" responses were combined for each standard to measure overall neighborhood support.
- Standards receiving **majority support (combined values of more than 50% on each standard)** are recommended to be **submitted to the City and included** in the draft petition.
- Proposed standards not receiving majority support will not be submitted, **unless** they are required elements of the City's Conservation District process.

This methodology applies the same evaluation standard to every proposed standard.

Survey Results Summary

Survey Results Summary *(cont.)*

- **Majority Community Support - 24 proposed standards**
- Recommended to be carried forward into the Committee's draft petition.
- Two proposed standards, **Chimneys and Windows**, received less than majority support but are required elements of the City's Conservation District framework. These standards will remain in the Committee's draft petition.
- **Not Recommended - Solar Energy Systems**

What We Heard

- The survey indicates strong neighborhood support for proposed standards that preserve the established character of Wynnewood North.
- Where questions arose, they generally reflected a desire for additional information rather than broad opposition.
- Overall, the survey demonstrates a thoughtful and engaged community interested in preserving the neighborhood while maintaining a fair and transparent planning process.

Additional Comments

All additional comments received through the survey will be provided at the end of this presentation

Committee Recommendation

The Committee recommends that proposed standards receiving majority support from survey respondents be **carried forward** into the Committee's draft Conservation District proposal.

This recommendation reflects:

- Community input
- A transparent methodology
- Consistent evaluation of every proposed standard
- Recognition of required City provisions

Next Steps

The Committee will:

- Submit proposed standards for review through the City's Conservation District process.
- Continue communications and listening to neighbors.
- Work with neighbors to obtain signatures
- Work with City staff on upcoming neighborhood meetings.

Thank You!

Thank you to every resident who took the time to participate in the Conservation District Survey.

Your participation has provided valuable guidance to the Conservation District Committee as it develops proposed standards for consideration by the City of Dallas.

Guiding Principles

The Committee's work is guided by a commitment to:

- Listen to our neighbors.
- Apply a consistent and transparent process.
- Recommend proposed standards that reflect majority community support.
- Preserve the character and quality of Wynnewood North for future generations.

This survey represents an important step in an ongoing community conversation.
